* Indicates that the lesion contours have not been confirmed (for volumetric metrics) or that Long/Short axes have not been confirmed (for metrics dependent on L/S.)
This report contains only metrics for lesions that have been documented in HealthMyne QIDS and are included in the most recent study or a selected relevant prior study. There may be lesions for this patient that are not included in this report. Lesions are categorized according to the manually entered location label. If a lymph node has not been labeled then it will not use lymph node specific metrics and will not be labeled as lymph node in this report.
